PROJECTS

- **E-commerce Website** :- Built a responsive website using React, and Tailwind CSS. Utilized Hooks like useState, and useEffect for efficient state management. Implemented React Router for client-side routing and improved navigation. Integrated Context API for global state management and avoiding prop drilling. Developed a user-friendly interface with an easy checkout process.

- **Notes making Application** :-Developed a to-do list application with React, allowing users to add and delete tasks.- Implemented local storage to persist data across page refreshes, ensuring data is not lost.Utilized React state to manage and update the list of tasks dynamically, without the need for a page reload.
- **Redstore E-commerce Shop** :-Created an eCommerce website using HTML, CSS, and JavaScript to provide a user-friendly and engaging online shopping experience.Implemented a responsive design, making the website accessible on desktop, tablet, and mobile devices.
